

Fire Fighter

The Fire Fighter has been designed for maximum comfort in extreme heat conditions and fire environments.

The Fire Fighter is constructed using comfort padding to ensure your eyes are protected from stray particules as well as protection from splash.

The comfort pads are contoured around each eye, giving you maximum protection.

The goggle is ideal in any high temperature work environment, including fire fighting, furnace works, smelting, fire break burnoff, and so forth.

The goggle is equipped with a controlled ventilation system with foam padding protecting the ocular area.

The low profile design is great for wearing under helmets.

The Fire Fighter is certified to AS/NZS1337.1 with medium impact protection.

The Fire Fighter passes medium impact ballistics testing after conditioning for 4 hours at 120°C (Thermal Stability Requirements) as per Australian Standards.
