Uppers

Waterproof leather, hydrophobised, breathable, 2.0 – 2.2 mm thick

Inner lining

CROSSTECH® Laminate Technology, waterproof and breathable. Abrasion-proof lining fabric for optimum climate comfort at all times of the year, especially when frequently moving between indoors and outdoors. Excellent penetration protection against blood and other bodily fluids (thus preventing ingress of viruses and bacteria).

Inlay

Comfortable with cushioning and moisture-wicking effect. Separate heel cup ensures optimised cushioning and foot guidance. "AIRFLOW" channels. "Perfect Fit" marking for optimised boot size choice.

HAIX® composite protective cap

Anatomically shaped, ultra-light protective cap made of fibre-reinforced plastic to meet the very highest safety requirements.

Insole

Moisture-absorbent fleece insole.

HAIX® High Durability Cap System

TPU cap with special profile to ensure longer service life.

HAIX® protective sole

Flexible, lightweight metal sole insert to prevent punctures.

Sole

Lightweight rubber/PU sole with a sporty look and robust road/terrain profile, increased rolling comfort, abrasion-resistant and non-slip - even in the cold. The PU cushioning wedge with its low weight ensures excellent walking properties and very good insulation against the cold. The outsole is flame, heat and fuel resistant and non-marking in accordance with EN 15090:2012. With the special inserts in yellow signal color, also recognizable in thick smoke.

HAIX® Arch Support System

Optimum foot support in the joint area thanks to anatomically shaped lasts; good foot guidance and secure hold thanks to narrow heel and joint area, thus even more comfort in the comfortable wide forefoot area.

HAIX® Identification System

Name field for boot labelling.

HAIX® Vario Wide Fit System

Three different boot inserts enable you to adjust the boot to the width of your feet.

HAIX® Climate System

Micro-dry lining around the upper end of the shaft uses the natural pumping motion generated as you walk along to transport moisture to ventilation slits at the shaft and tongue.

HAIX® RAPIDFIT System

Two-zone lacing system for quick and optimum lacing adjustment and correct fit of the boot. An integrated protector offers additional safety.

Sun Reflect

Reduces the heating effect produced on the upper leather by the sun's rays. Sunlight is reflected by the leather, thus ensuring that less warmth is directed to the foot.

Further features

Lateral reflective strips, 2-zone lacing system with protector, extra flexible shaft, pull-on straps, boot jack, ESD
