The Firestorm goggle is a low profile safety goggle with all the features you need come to expect in a goggle. The swivel hinge together with an adjustable length strap enables you go get that perfect fit. The soft frame sits comfortably on your face, ensuring foreign debris stays away from your ocular area. The low profile design enables you to wear the Firestorm goggle whilst wearing a helmet.

Certified to AS/NZS1337.1 with medium impact rating, the Firestorm goggle is your ideal safety goggle for just about any work environment. The antifog lens coating ensures you have crystal clear vision when you need it most.

The Firestorm has been approved for heat and fire ratings as well as hot solids resistance. The high temperature rating (Heat Resistance) allows the firestorm goggle to be worn in ambient temperatures of 120°C.

Available in both Clear and Smoke tints.

Optional Rx holder for you to have your own prescription lens fitted behind the goggle.
