

Introducing NEW
Gotcha2 Height Safety Rescue Kit

Gotcha2™

30% Lighter! 30% Smaller! Better Function!

Wanting to provide your workforce with the best in rescue kit innovation in the event of a fall from height? A fallen worker can be out of reach and needing urgent medical attention - a Gotcha2 gets them back for first aid fast

Gotcha2 is an ultra-lightweight update of the original Gotcha, used for remote rescue of casualties suspended from fall arrest equipment.

Gotcha2 Rescue Kit features

Single person use

Gotcha2 is for raising or lowering a single casualty by a single rescuer.

**READY
TO USE**

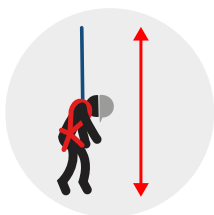

Pre-assembled kit

No assembly required by rescuer, essential in what can be a stressful situation.

Not possible to drop the casualty

Gotcha2 is a no cut kit. The casualty is raised to release their original attachment, so there is no risk of accidental release.

Rescue in either direction

Raise or lower the casualty to safety with the Gotcha2. Up to 50m lowering height, depending on kit selection.

Remote attachment pole

Allows the rescuer to reach the length of a fully deployed fall arrest lanyard from a point of safety.

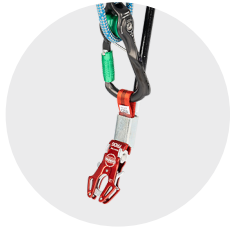

Intuitive to use

Gotcha2 is colour coded for simplicity and the anchor sling is normally secured to the casualty's own anchor point.

Gotcha2 Compact, lightweight, effective.

sealed packaging

Product Technical Information

Norms: EN 1496:2017

Lifespan: 10 yr.

Maximum User Weight: 140 kg

Label Protection: Yes

Colour: Red

Main Material: Polyamide

Environmental Sealing: Yes (Gotcha2 50m only)

Individually Serial Numbered: Yes

Individual Certificate: Yes

Multilingual User Instruction Manual: Yes

Packaging Unit (PU): Pcs

Packaging Unit (PU) Content: 1

Gotcha2 Remote Rescue Pulley System with Gotcha Pole and Gotcha Frog

- Kit rope lengths available: 50m, 100m, 150m
- Up to 50m lowering height when using 150m rope length kit
- Intuitive to use by casualties' co-workers
- Equally efficient for lifting or lowering rescues
- No cut operation
- Enhanced pulley system for more efficient lifting and greater control when lowering
- 30% lighter, 30% smaller
- Compact bag design for improved access through hatches and hooped ladders
- Pre-assembled kit comes in a environmentally sealed bag making it easier to inspect and maintain (Gotcha2 50m only)

Environmentally sealed packaging - please contact to confirm what kits come with environmentally sealed packaging

The Rescue Kit your workforce cannot afford to be without!

Lighter more compact Rescue Kit:

- Improved ergonomic bag design is easier to carry, especially where access is awkward for example through hatches and hooped ladders, and in confined spaces. Workers are more likely to carry it with them ready for immediate deployment.

Improved pulley system:

- Colour coded components for easy identification and simplicity.
- Better control during lowering – less risk of bouncing the casualty on the way down.
- More efficient lifting – easier to rescue a casualty larger than the rescuer.
- Increased lift height – making recovery back up to the platform from where the casualty fell easier.

Item Name & SpanSet Part Number	Weight Net	Rope Length	High Anchor Maximum Lowering Distance	Low Anchor Maximum Lowering Distance
Gotcha2 50m GOTCHA2-KIT-0	6.2 kg	50 m	16 m	12 m
