

# ERGOTECH ACTION ELITE

## Ergotech-Mid Range

Developed after careful research and extensive user trials into the ergonomics of firefighter activities, the ErgoTech Action Elite has become the standard by which lightweight firefighter PPE is measured for comfort and performance.

ErgoTech has been developed in close collaboration with the world's leading fibre and fabric manufacturers. It has become a globally recognised design by fire agencies looking to equip their firefighters with PPE, which combines outstanding protection with low physiological impact. The MSA Bristol standard Ergotech Action Elite ensemble comes with a TITAN PBI® 1260 outershell, GORE® CROSSTECH® AIRLOCK® moisture barrier and Nomex® 'slick' thermal liner.

Ergotech Action Elite can be customised with a different outershell fabric and moisture barrier on request. Lead times apply for custom garments.

**Certification AS4967:2019**

### ErgoTech Action Elite Structural Firefighting Jacket

#### Product Features

- Collar and throat tab shape provide optimal compatibility with helmet and fire hood.
- Shaped panel over the shoulder eliminates the shoulder seam and makes a smoother line with greater comfort when wearing breathing apparatus.
- Increased underarm gusset allows more manoeuvrability when reaching overhead.
- Two action pleats added at the back shoulder.
- Tecashield on elbows.
- Cuffs with thumb holes.
- Inspection port with zip closure.
- Hanging loop for storage.
- Loop panels on front left and right breast for removable hook & loop badges.
- Large logo / service branding area on the back of the jacket.
- Radio pockets
- Pen pocket
- Logo print available on the back
- 28 male & 28 female standard sizes, with made to measure options available.

### ErgoTech Action Elite Structural Firefighting Trousers

#### Product Features

- Top of trouser contoured to the body with raised back and elasticated adjustment across lumbar region.
- Removable "H" pattern braces – designed not to twist.
- Articulated knees with convex seams for greater flexibility when bending/climbing.
- Shaped seaming on back of knee to reduce fullness when crawling.
- Tecashield on knees provides protection and greater durability.
- Two large half bellow pockets.
- Inspection port with zip closure.
- American specification 3M™ perforated triple trim.
- Hook & loop leg openings.
- Hanger loop for easy storage.
