

CHAOS BELT

This modern belt concept allows users to carry the Chaos Throw Bag on their waist or affixed to the thwart of a boat, allowing it to be easily accessible by the rescuer. Featuring a double side bag release system the throw line can be stowed in the belt easily, even when the user is wearing gloves and released quickly in an emergency by either left or right handed users. A backpack style adjustment buckle for a complete fit on the body and ease of fitting,

with a separate quick release toggle allowing rapid release, should the bag or the belt become snagged in the water.

The Chaos Belt is specifically designed to be worn with the oval shaped Chaos Throw Bag, yet it will also accommodate other throw bags with a circumference of 38- 43 cm.

DATASHEET CHAOS BELT
